# MAINTENANCE BULLETIN

AN/TPQ-36 RADAR	FILE NO. 149	REVISION: A
SUBJECT: MAINTENANCE KIT NSN ASSIGNMENT	DATE: 9 MAY 1997	CATEGORY: A
SYSTEMS AFFECTED: US ARMY		

Maintenance Bulletin 149, dated 1 July 1995, moved 17 DS Class IX ASL items for a Light Division (3 AN/TPQ-36 plus ready brigade support) to "AT HHB DIVARTY". These items presently appear in the Essential Repair Parts Stockage List (ERPSL) for a Light Division under the "AT HHB DIVARTY" column of Technical Manual (TM) ERPSL 11-5840-363-24P, dated May 1997.

These 17 items now comprise a kit, which is nomenclatured "Maintenance Kit", with a National Stock Number (NSN) of "5895-01-443-8192". This maintenance kit appears in the above mentioned ERPSL for a Light Division and is coded as "initial issue, order by component only". Units will not be able to order this maintenance kit separately.

The PM MEMORANDUM, dated 27 September 1996, recommended that the unit keep all items in their Prescribed Load List (PLL) ERPSL 11-5840-363-24P as critical and necessary to maintain operational readiness. It was explained that these items were "initial issue" and were, therefore, not subject to the HQ DA Message DALO-SMZ-C, P R 131222Z Aug 96, subject: Prescribed Load List (PLL) Management, which requires Commanders to significantly reduce PLL levels. Each unit is therefore responsible for maintaining stockage of those items that they may have previously turned in for reimbursement. They will not be free issued by the PM or DA except in the case of a new fielding. This is keeping with the original FIREFINDER philosophy.

The list of items that comprise the maintenance kit is attached to this Maintenance Bulletin 149, Revision A.
